Pendahuluan : Stroke merupakan salah satu masalah kesehatan yang penting dan perlu diperhatikan. Selain jumlah kasus yang semakin meningkat, stroke dapat menyebabkan penurunan kualitas hidup penderitanya

Tujuan : Memberikan gambaran asuhan keperawatan pada pasien dengan penyakit Stroke Non Hemoragik secara komprehensif.

Metode : Penelitian ini menggunakan metode penelitian deskriptif dalam bentuk studi kasus dengan pendekatan Asuhan Keperawatan, sampel yang digunakan sebanyak 2 responden, dilakukan di Ruang Mawar RS. Kamar Medika

Hasil : Berdasarkan pada pengkajian, penegakkan diagnosa, intervensi, implementasi dan hasil evaluasi, pada pasien pertama ditemukan tiga diagnosa keperawatan yang muncul dan dua teratasi hari ketiga dan dua teratasi. Pada pasien kedua ditemukan tiga diagnosa keperawatan yang muncul dua teratasi pada hari ke dua dan tiga teratasi.

Kesimpulan : Pada pasien 1 terdapat 2 masalah yang teratasi sebagian yaitu gangguan komunikasi verbal, dan 1 masalah lainnya teratasi seperti gangguan mobilitas fisik dan resiko jatuh. Sedangkan pasien 2 terdapat 3 masalah keperawatan yang teratasi yaitu pola napas tidak efektif, gangguan mobilitas, dan resiko jatuh

Kata Kunci : Asuhan Keperawatan, Stroke Non Hemoragik

ABSTRACT

NURSING CARE WITH OBSTACLES OF PHYSICAL MOBILITY IN NON-HEMORRIC STROKE PATIENTS IN MEDICAL ROOM HOSPITAL
