ABSTRACT

APPLICATION OF PROFESSIONAL NURSING PRACTICE MODELS IN PROF. DR. SOEKANDAR PUBLIC HOSPITAL MOJOKERTO DISTRICT

ADELIA FERDIYANTO PUTRI

The professional nursing practice model was the management of the structure and process of providing nursing care at the level of the nursing room so that it allows the provision of professional nursing care. Professional nursing practice models improvement can describe the efforts of various countries to advance the quality of nursing care and the nurse's work environment. This study aimed to determine the application of professional nursing practice models at the Regional General Hospital Prof. Dr. Soekandar, Mojokerto Regency. The design of this study uses descriptive survey. The population in this study was all nurses in the inpatient room of the Regional Public Hospital Prof. dr. Soekandar, Mojokerto Regency, as many as 80 people. The sampling technique of this study was purposive sampling. The sample of this study were nurses in the inpatient room of Mataram, Pajajaran, Blambangan, Majapahit, and Kahuripan Regional Public Hospital Prof. dr. Soekandar, Mojokerto Regency, 44 people. The research instrument used a questionnaire. The results of this study indicate that almost all respondents applied the professional nursing practice models properly. Nurses who provided care were nurses who were experienced in providing nursing care and working in hospitals in teams so that they had professional values, professional relationships, management approaches, nursing care approaches, and well-implemented compensation and awards.
